

A dream come true for couple after scooping business award

Dream Doors Chester and Wirral, part of the UK's number one makeover retail network, has been awarded the 'Exceptional New Starter' award at the franchise's 2017 annual conference. The showroom is owned by Mark and Fiona, who were praised for their honesty, openness and can-do attitude.

Having opened an inspirational showroom in the Wirral this summer, Mark and Fiona have integrated themselves into the local community, completing a great number of kitchen facelifts and full kitchens to incredible acclaim.

Mark and Fiona had this to say about their award win: "We are so delighted and very proud to win the Exceptional New Starter award. Thank you to all our customers who made this possible – we couldn't have done it without you. This award reflects on our team's dedication to customer service and our passion for helping customers turn their dream kitchen into a reality."

Dream Doors is the UK's leading replacement kitchen door franchise, offering made-to-measure replacement kitchen doors and worktops as well as full new kitchens. The company has over 60,000 kitchen makeovers to their name and has won 'Best Kitchen Supplier' and

'Best Money Saving Product' in the 2017 Express Home and Living Awards. Mark and Fiona are encouraging anyone who is interested in a kitchen facelift or full new kitchen, to get in contact for a friendly conversation. Their showroom is based at 42 Pensby Road, Heswall, Wirral, CH60 7RE.

Swallowing difficulties, reflux, persistent cough and snoring

The untold number of people that suffer from swallowing difficulties – dysphagia – is huge. As is the number with snoring and sleep apnoea – sometimes in conjunction with dysphagia. Difficulties like this can hit anyone, and at any age. Now there is a neuromuscular treatment, IQoro®, which trains the slack internal musculature and allows people to regain their former quality of life.

Jane was eating lunch one day when she was struck by intense heartburn. She recalls that episode.

- It was extremely unpleasant and returned several times during the week. The problem worsened, she became nauseous, her voice was rendered hoarse and croaky. Food she had just swallowed started to run back up into her pharynx.
- I raised my head on pillows at night, but it didn't help. I hardly slept at all, and was always tired.

Jane lost her zest for life and became apathetic. Eventually she visited the doctor, and ended up returning home with antacid medicines that seemed only to worsen her condition.

- The medicine was terrible. I felt so bad and the tablets gave me stomach upset, she said.

Jane's family grew increasingly concerned. They could see her suffering, and her dramatic weight loss – eight kilograms in just a few weeks. During another visit to the doctor, Jane underwent a gastroscopy, and was diagnosed with a Hiatus hernia. But the formal diagnosis only led to new medication, which eased the symptoms somewhat, but did not restore her to her previously sound health. Around this time, feeling desperate, she turned to the Internet.

- I came across a Facebook support group of people with the same health issues, and from there I learned of a woman who had been hugely helped by a Swedish treatment method.
- That really caught my attention, so I ordered one.
- A few days later Jane started her training with IQoro®. After just a few weeks she felt that she had turned a corner.
- The horrible sensations of nausea, heartburn and the reflux went away. Furthermore, I could keep my food down, and could finally sleep, and could discontinue

Jane, together with her daughter graduating from medical school.

with the not-very-useful medicines. I hardly dared believe it, that I had overcome this, but time proved that I had. Read more at iqoro.com

- EASY TO USE
- 1½ MINUTES' TRAINING PER DAY
- SCIENTIFICALLY PROVEN EFFECT
